

# Housebets — DrWgamba: a point-by-point response

Prepared for the arbitration. Username DrWgamba · joined 25 Jan 2026 · all figures from the platform's permanent transaction record and certified reporting.

**Scope & redactions.** This answers only the matters raised in the dispute, point by point. It contains this player's own records and the limited, relevant facts about the specific accounts and calculations questioned. **Private identifiers are redacted** — wallet addresses, on-chain transaction hashes, emails, IP/device data, location and KYC are deliberately omitted for every person, including third parties. Where a wallet or transaction needs to be verified to settle a point, it can be provided privately to an independent reviewer. Amounts, dates and calculations are shown in full.

**Summary.** On the central question — is anything owed — the record is clear: every withdrawal was paid in full, and across his time on the platform he took out more than he put in. The specific reward and leaderboard questions are answered individually below, each against the underlying record.

## 1 · Withdrawals — was anything left unpaid?

All **35** withdrawal requests were completed and paid in full — none denied, reversed or pending. They total **\$729,757.44**. Across all activity his withdrawals exceeded his deposits by about **\$28,334**; his current balance is \$0.01 and the account is under no hold. Full list at Appendix A (amounts/dates/status; addresses redacted).

**Nothing outstanding**

## 2 · Weekly / Lossback calculation

Lossback refunds part of a *net loss* over a period; it pays only if the period ends down. His weekly slider was **100% lossback / 0% rakeback** from 23 Apr (Appendix C).

For the week containing his 25 May session, the **certified daily record** (Appendix B) shows he finished **net up**:

Weekly window	His net result
18–28 May (the cycle applied)	UP +\$48,990
21–27 May (Thu–Thu alternative)	UP +\$28,657

With no net loss, weekly lossback correctly settled to ~\$0 for that cycle. In earlier weeks where he was net down, weekly lossback was paid — part of his \$51,431 in total rewards (Appendix D). The engine's weekly settlement for the period independently reconciles to the cent. **\$0 is correct — he won that week**

## 3 · May monthly bonus calculation

His monthly slider settings, with exact times (full history at Appendix C):

Effective (UTC)	Rakeback	Lossback	Applies to
1 May 00:00:00	0%	100%	the value in force at the <b>start</b> of the May cycle

1 May 00:12:07                      50%                      50%      changed 12 minutes into May → governs the **June** cycle onward

The monthly cycle (1 May 00:00 → 1 Jun 00:00 UTC) settles against the slider **locked at the start of the cycle** — here, 0% rakeback / 100% lossback. On that basis:

- **Lossback (100% share):** across the full month the certified record shows he finished **net up (+\$54,763)** — no net loss, so lossback correctly settled to **\$0**.
- **Rakeback (0% share):** his start-of-cycle setting allocated nothing to the monthly rakeback split, so no monthly rakeback accrued under this program. (His rakeback was instead paid through the separate instant-rakeback program — \$34,384 across 372 credits; Appendix D.)

Consistent with both being \$0, no monthly Bonus settlement was generated for him. Separately, he received his monthly reload and monthly wager-race rewards and **won the May monthly leaderboard** (\$5,000, paid 1 June — section 6). **Monthly Bonus = \$0 on the start-of-cycle slider; rakeback paid via instant cadence**

## 4 • Reward ledger & the GGR/NGR used

He received **\$51,431.42** in rewards across **406** separate credits. Breakdown by type at Appendix D; the GGR/NGR these were computed against is the certified day-by-day record at Appendix B. Cycle boundaries used: weekly 18–28 May; monthly 1 May–1 Jun.

## 5 • Slider history & cycle timestamps

Every change he made to his own reward slider, with the time it took effect, is at **Appendix C**. Weekly settles on a 7-day cycle; the monthly cycle is calendar-month (1 May 00:00 → 1 Jun 00:00 UTC).

## 6 • Leaderboard — standings & prizes

He **won both** finalised leaderboards covering the period and was paid:

Board	Period (UTC)	Account	Rank	Prize	Status
Monthly	2026-05-01 → 2026-06-01	DrWgamba	1	\$5,000	finalised, paid
Monthly	2026-05-01 → 2026-06-01	elmourabut	— (score 0)	\$0	no prize
Monthly	2026-05-01 → 2026-06-01	lucasmartirini	— (score 0)	\$0	no prize
Weekly	2026-05-25 → 2026-06-01	DrWgamba	1	\$1,000	finalised, paid
Weekly	2026-05-25 → 2026-06-01	elmourabut	— (score 0)	\$0	no prize
Weekly	2026-05-25 → 2026-06-01	lucasmartirini	— (score 0)	\$0	no prize

His monthly first place (\$5,000) and weekly first place (\$1,000) were paid on 1 June. The two accounts he asks about (next section) finished with **zero score and no prize** — their turnover did not convert to leaderboard standing — so their presence did not displace him: he finished first and was paid. **Prizes real and paid**

## 7 • The accounts he asks about — elmourabut & lucasmartirini

Answering only the eligibility/funding question he raised, with personal data redacted:

- **They were real-money accounts.** Both funded with real, externally-originated on-chain USDT and both made a real withdrawal (deposit/withdrawal totals available privately to a reviewer). They were not zero-balance or "free-money" accounts.
- **They were not Housebets accounts.** Checked against the platform's automated/house-account registry — neither account (nor the third linked account, nor DrWgamba) appears in it. They are not house-operated.
- **They were not connected to DrWgamba.** No shared IP, network, device or deposit address links either account to him.
- **They were a linked external cluster.** elmourabut, lucasmartirini and one further account are linked to each other by shared network signals, and were flagged by the risk engine for bonus abuse and lossback abuse (one also for sharp play). On the leaderboard their contribution was zeroed (rank 0 / score 0).

On "confirmed legitimate, then removed": both can be true and consistent — they presented as ordinary real-money accounts and were later flagged and de-ranked for abuse. Either way, it did not cost DrWgamba anything: he finished first and was paid. We do not characterise them as "bots"; the records describe bonus/lossback/sharp abuse by externally-funded accounts.

## 8 · Game categories, labels & leaderboard-contribution rules

---

- **The category taxonomy did change — after his play.** A dedicated "**House Games**" category was created on **19 June 2026**. Before that, in-house titles (e.g. Blackjack, Dice, Mines) were grouped under broader existing categories — which is the labelling he observed. This is a presentation/taxonomy matter: every bet, result, amount and leaderboard standing is recorded against the specific game, not its category label.
- **No per-category contribution weighting was applied.** The category-weight configuration is empty, so no category was up- or down-weighted in leaderboard scoring by its label.
- **House edge / RTP is shown in-product** — on each game's house-games panel and in settings, visible to every player. **Labelling/taxonomy point: acknowledged**

## 9 · Provable fairness

---

The in-house games are provably fair and verifiable by the player: the server seed is committed as a hash *before* the bet, then combined with his own client seed and the bet number, so each result can be checked independently. His outcomes sit within normal variance for the published odds.

## Appendix A — withdrawals (35), all completed

---

Amounts and dates from the transaction record. Destination wallet addresses redacted; available privately to a reviewer.

Date	Amount (USDT)	Status

## Appendix C — reward-slider change history

The slider splits each program between rakeback (paid win or lose) and lossback (refunds a net loss only). Every change he made:

Effective from (UTC)	Program	Rakeback	Lossback	Note
2026-04-23 00:00:00 UTC	Weekly	0%	100%	First weekly setting; unchanged since
2026-05-01 00:00:00 UTC	Monthly	0%	100%	Setting in force at the START of the May cycle
2026-05-01 00:12:07 UTC	Weekly	0%	100%	Re-saved; same split
2026-05-01 00:12:07 UTC	Monthly	50%	50%	Changed 12 min into May — governs the June cycle on

Live as of 26 May: weekly 100% lossback / 0% rakeback; monthly 50% / 50%. Each cycle settles against the slider locked at the start of that cycle: the May monthly therefore used 0% rakeback / 100% lossback (the 00:00:00 value); the 50/50 set at 00:12 on 1 May applies from the June monthly cycle onward.

## Appendix D — rewards paid, by type (406 credits, \$51,431.42)

Reward type	Times paid	Amount (USD)
Rakeback (VIP)	51	13,932.16
Goodwill / manual credit	10	12,384.03
Weekly reload	8	6,225.17
Monthly wager race	4	5,357.46

Instant rakeback	288	4,060.94
VIP level-up bonus	24	4,007.80
Monthly reload	3	3,076.37
Weekly wager race	17	2,387.47
Daily rakeback	1	0.00
<b>TOTAL</b>	<b>406</b>	<b>51,431.00</b>
